

Employee Attrition & HR Analytics Dashboard - Recommendations Report

Executive Summary

This report analyzes workforce demographics, employee satisfaction, engagement, and attrition patterns to support retention strategies.

Key Findings

Attrition is concentrated in specific departments and among employees with lower satisfaction and engagement scores.

Retention Recommendations

Improve career development opportunities, review compensation structures, and strengthen employee engagement programs.

Work-Life Balance Improvements

Reduce excessive overtime and promote flexible work arrangements.

Training & Development

Increase training participation and leadership development programs.

Promotion Strategy

Provide transparent promotion pathways and internal mobility opportunities.

Expected Impact

Higher retention, improved engagement, reduced recruitment costs, and stronger workforce stability.

Conclusion

The HR Analytics Dashboard enables data-driven workforce planning and employee retention decision-making.
